TS-590 TechNote
TS-590SG/TS-590S Menu Conversion Table

by Ian Wade, G3NRW

Version 1.0

28 April 2017

Introduction

The TS-590SG and the earlier TS-590S have broadly similar menu functions, but the menu numbering scheme differs between the two radios. This TechNote contains a conversion table between the two sets of menus, which helps if you are reading a document that was written for the TS-590SG, for example, but you happen to have a TS-590S and need to know the equivalent menu number.

For example, referring to the chart on the next page, if the TS-590SG menu number is **67**, the equivalent TS-590S menu number is **61**.

A suggested convention for future documents is to include *both* equivalent menu numbers, with the TS-590SG menu first, then a slash, followed by the equivalent TS-590S menu. For example, the text may say something like:

> "Set the TX Filter for SSB-DATA High Cut to 2700 (menu **34**/**28**)."

This will make it easier for owners of either radio to select the correct menu number.

For more details of the menu functions and possible settings for each function, see the "TS-590SG Whitepaper: Software Incompatibilities with the TS-590S" [1].
